Biosketch

Biography:
Priyanka Mendon holds an Executive MBA in Pharmaceutical Sciences, an MSc in Bioanalytical Sciences, and two clinical data management certifications, Certified Clinical Data Manager (CCDM) and Qualified Clinical Research Data Manager. With a career record spanning over a decade, Priyanka has been able to showcase skills in team and data management within the clinical data management domain.

Education:
Priyanka's academic journey includes an Executive MBA in Pharmaceutical Sciences from the Narsee Monjee Institute of Management Studies, Mumbai, India, Master in Science in Bioanalytical Sciences, and a Bachelor of Science in Life Sciences, both from Bombay University, India. Her commitment to continuous learning led her to complete a Post Graduate Program in Data Science and Business Analytics, affiliated to the Univeristy of Texas, Austin.

Professional Journey:
Before joining Luxembourg Institute of Health in July 2021, Priyanka has worked in prominent contract research organizations that helped hone her technical and leadership skills. While working in the CRO industry, she has successfully completed projects for big Pharmaceuticals like Roche, Genentech, AstraZeneca, Merck &Co., Sarepta Therapeutics, Regeneron Pharmaceuticals etc.
List of Organizations are as below:
1. IQVIA as Data Team Lead.
2. Accutest Research Laboratories as Associate Project Manager
3. Syneos Health as Clinical Data Associate
4. Cognizant Technology Solutions as Data Analyst.
5. Tata Consultancy Services as Clinical Data Manager.

Clinical Data Management Experience and Expertise:
1. **End-to-end Data Management:** Extensive experience in managing data for epidemiology studies and clinical trials, from setup to closeout. e.g. Case Report Form and database development, discrepancy management, medical coding.
2. **Study Documentation:** Proficient in developing and maintaining study setup documents, specifications, and guidelines.
3. **Data Analysis Tools:** Skilled in using REDCap, Medidata Rave, Ennov Clinical and Oracle Inform.
4. **Project Management:** Successfully leading data teams, a primary point of contact for sponsors, clinical data management activity budgeting, and contributing to study progress reporting.
5. **Training:** Providing training on data management procedures and conducting study-specific sessions.
ECRIN:“Advanced Data Management courses” (2023), in house Clinical data management courses at LIH.

Experience on Therepeutic Areas for Clinical Data Management Activities:

- Neurology:

- Respiratory:

- Oncology:

- Rare Diseases:

- Pediatric Health:

- General Medicine:
